## COMPACTO® BASIC XM

Compact Seat with Mechanical Suspension

# COMPACTO<sup>®</sup> BASIC XM

## Technical data

### Compact Seat

The Compacto Basic XM has a mechanical suspension with a suspension stroke of 60 mm. A single lever in front is used to set the seat's height and adjust it to the user's weight. An additional height limiter also ensures outstanding comfort in very small, low-profile driver cabs. The ergonomically designed two-piece seat shell made of synthetic leather with air channels ensures fatigue-free working.

Mechanical suspension

Manual weight adjustment
