MAXIMO® M

Standard Seat with Mechanical Suspension

MAXIMO® M

Technical data

Standard seat

In order for a seat with mechanical suspension to deliver good comfort, it must be possible to adjust it to the user's weight. Here this is done using a convenient setting lever. The adjustment features of the Maximo M set new standards among mechanical-suspension seats. The seat height can also be varied in three steps, thanks to a mechanism with positive stops. Additionally, the mechanical lumbar support offers ideal support for the spine. The ergonomic shape of the tapered backrest and the wide cushions combine maximum freedom of movement with firm support. The Maximo M is suitable for forklift trucks and construction machines.

Features

	MAXIMO® M		MAXIMO® M
ARTICLE NO.		6	Restraint system, duosensitive
