KINGMAN® DRIVER SEATS

Optimum seating comfort for commercial vehicles

KINGMAN® DRIVER SEATS

PROVEN COMPANIONS ON ALL ROUTES

The KINGMAN driver seats offer high-level ergonomics and seating comfort. With their tried-and-tested suspension system and broad range of comfort features, they have been reliable companions in trucks for years. The GRAMMER "Design-for-Use" philosophy ensures that they can be operated intuitively as the shape and positioning of the buttons and levers on the seat reflect their function and direction of operation. All Kingman driver seats have received LGA "Ergonomics Approved" certification.

KINGMAN® HP STANDARD

Plenty of comfort even in the entry-level class. Even in its standard version, the Kingman offers ergonomically shaped seat and back cushions, adjustable side support and two-step lumbar support. The variable suspension system with an adjustable shock absorber, lockable fore/aft isolator, height adjustment with an inclination mechanism and automatic weight adjustment as well as a quick-down system for easy entry and exit complete the overall package.

KINGMAN® HP COMFORT

Features additional comfortable extras such as seat cushion depth adjustment with individually adjustable length for thigh support. With its two settings, the seat heating quickly provides pleasant warmth in cold weather, while the adjustable and removable neck cushion offers soothing relief to your neck.

KINGMAN® HP CLIMATE

Ergonomics offering maximum well-being. The high-quality Alcantara cover and the extra-soft padding in the head area create a particularly comfortable seating sensation. A further bonus is the active seat climate control system, in which heat and moisture are dissipated at the seat contact surfaces. The two-step setting allows the system to be adjusted to ambient conditions and personal preferences, while on cold days the seat heating provides pleasant temperatures. Climate comfort is an important aspect of well-being in the vehicle as it can heighten the driver's attention and prevent fatigue and exhaustion.
