

## **Grammer provides top ergonomics to retrofit: Roadtiger for MAN TGX and TGA**

- *Grammer seat Roadtiger now available for MAN models TGX and TGA*
- *Top ergonomics certified by TÜV Rheinland, excellent product design*
- *Luxury, Comfort and Standard versions can be quickly installed and are ideal for demanding applications*

**Grammer AG, July 13, 2023** – Maximum comfort, the best ergonomics and intuitive operation – in the tough day-to-day work of truck drivers, these are not "luxury features", but essential seat characteristics for remaining fit and healthy in the long term. Grammer has exactly perfected these features with the Roadtiger aftermarket driver seat, which is now available for the current MAN trucks in the TGX and TGA model series.

### **Fit and healthy thanks to best ergonomics and strong product design.**

Since its market launch, the Grammer Roadtiger has been writing a success story: The product design was awarded the renowned Red Dot Award. German TÜV Rheinland certified the 2022 Luxury and Comfort versions with the LGA "Ergonomics Tested" certificate for their top ergonomics. And Roadtiger drivers around the world are grateful that they no longer must get out of the truck with back pain after a long day on the road. Numerous trucks from Mercedes-Benz and DAF can already be equipped with the Grammer seat – and now retrofitting is also possible in the MAN models mentioned.

### **Quick and easy installation**

Whether Luxury, Comfort or Standard – all variants of the Grammer Roadtiger come with installation and operating instructions, an ABE (General Operating Permit) and an optional installation kit. The latter consists of an adapter plate and a pre-assembled plug set that enables easy plug-and-play installation. This not only saves time, but also eliminates sources of error. This means that seat replacement is no problem for authorized workshop partners and can be completed quickly.
