PRIMO® EL PLUS

Premium Seat with Active Weight Adjustment

PRIMO® EL PLUS

Technical data

Premium seat

The low-frequency suspension with travel of 110 mm in the Primo EL Plus delivers outstanding comfort despite the seat's low height. Its premium package of comfort-enhancing features includes passive seat climatization and active pneumatic weight adjustment, which is very advantageous with frequently changing drivers. The seat automatically sets itself to the operator's weight to maximize vibration attenuation. Integrated heating and a mechanical lumbar support are included as standard features. The seat meets the latest safety requirements and is equipped with a seat and belt contact switch as well as a duosensitive ELR-belt system with orange belt straps as standard.

Pneumatic suspension

Low-frequency suspension

Mechanical lumbar support

Passive climate system
